For 40 years, the Craig School has helped children who have not succeeded in the traditional classroom become successful learners. Learning difficulties need not be a deterrent to any child's aspirations--examples abound of people who have learned strategies to work around their differences and who have had great success as adults.

Our mission is to work with children with learning disabilities and to help them acquire the skills they need to enable them to learn steadily throughout their lives. We accomplish this by providing a nurturing, supportive, and structured learning environment characterized by:

- Personal attention
- Strategy based instruction
- Organizational methods & study skills
- An integrated academic & social support system
- Specialized computer technology

The Craig School, founded in 1980, is a college-preparatory independent school located on two campuses: a lower school (grades 3-8) in Mountain Lakes, New Jersey and an upper school (grades 9-12) in nearby Montville, New Jersey.
